

Safety made easy.

The Mine Site Support team of qualified safety advisors provide coaching and practical, hands-on support to improve health, safety and operational efficiencies within the workplace.

We also help operational teams successfully plan and execute safety strategies during high-risk shutdown activities. We have vast experience working for tier 1 mining companies and contracting partners on a range of mine sites in Western Australia.

Professional. Experienced. Driven.

Mine Site Support is a 100% Indigenous-owned and operated business based in Western Australia. Managing Director, **Ryan Kennedy** established the business in 2018 following a successful career in safety management for the resources, mining and construction industries.

Ryan is a highly productive, down-to-earth leader with an inclusive and engaging communication style. He is proud of his Noongar heritage and connection to country, and is driven to achieve positive results for his clients and his team.

Our Team

The Mine Site Support team consists of a male/female mix of very experienced, site-based professional safety advisors. Our people are highly organised, customer-focussed and enthusiastic, with excellent communication and interpersonal skills. We can operate as a bolt-on safety department or a valuable extension of your existing team.

Safety is part data, part tea leaves.

We've got the qualifications, the experience, the science and the gut-feel intuition needed to achieve strong safety results. Zero harm is the goal but sometimes people make mistakes and accidents happen. We work smarter to improve the odds with better controls, better engineering and better team buy-in.

Relationships drive safety and productivity.

Your people, equipment, planning and systems affect the safety and quality of your work. We value people and understand the challenges in keeping everyone safe.

Have a suite of safety documentation but don't know how to use it?

We can help you plan and implement what needs to be done. We'll help you understand what you need, and what you can leave behind. Let us show you how to structure your day to be more effective and efficient.

We help you build a solid safety-orientated culture.

How? By replacing the alienating jargon and misaligned goals with a holistic approach to safety. We work with you to provide clear health and safety communication that makes sense, serves a purpose and adds value.

We get the job done safely and on time.

Whether we're working for a major mining company, a contracting partner or a small business owner, the same principles apply – we streamline the processes, ensure the plans and documentation are easy to understand, get our team on site and make sure everyone is engaged.

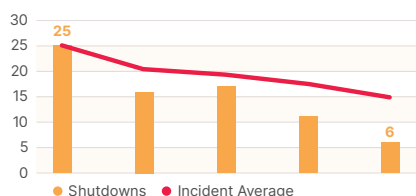

Case Study: High-level Safety Improvement Plan (2023)

Mine Site Support was engaged to establish our mining client's maintenance department as an industry leader that consistently achieves zero injuries (MTI & LTI) and increases resource productivity while reducing its Opex expenditure.

By implementing specific initiatives and execution strategies, we reduced our client's incident rates by 75% over five shutdowns. We also developed strategies to reduce overall safety resourcing costs over the same period, and created an environment in which to maintain the safety culture in the future.

Our Clients

We have strong experience working in the resources, mining and construction industries in WA, having worked on BHP, FMG, Rio Tinto and Roy Hill sites.

Our clients include major mining companies, contracting partners to the major miners, as well as small contracting companies who want to provide services to the mining industry. We work with shut superintendents, project supervisors, business owners and others who are looking to improve their health, safety and operational efficiencies.

We are proud of the many positive, measurable outcomes we have achieved on behalf of our clients. These include significant reductions in safety incidents and costs, and an increase in business efficiencies, along with better staff engagement.

Our Services

At Mine Site Support, we are proactive and hands-on about health and safety management. We also have strong operational experience. We offer practical advice and solutions that represent real value.
